# Topic Overview: Server-Side Database Interface (DBI)

Computer Science 3172

25 March 2005 (1a)

## 1 Goals

- Build on CGI from previous section to solidify and extend the understanding of the following principles:

    - client-server communication,
    - server-interrogation,
    - statefulness;

- Understand (and perhaps build) e-commerce applications.

## 2 Topics

- Review of SQL and middleware
- Introduction of structural components of distributed database applications

## 3 Readings

Lecture notes
