Call for Papers

15th Canadian Conference on Computational Geometry

August 11-13, 2003

Dalhousie University, Halifax, Canada

The Canadian Conference on Computational Geometry (CCCG) focuses on the mathematics of discrete geometry from a computational point of view. Abstracting and studying the geometry problems that underly important applications of computing (such as geographic information systems, computer-aided design, simulation, robotics, solid modeling, databases, and graphics) leads not only to new mathematical results, but also to improvements in these applications.

Despite its international following, CCCG maintains the informality of a smaller workshop and attracts a large number of students.

Call for Papers

Authors are invited to submit papers describing research of theoretical and practical significance to computational geometry. Electronic submissions, in standard PostScript and not exceeding 4 pages length, should be made from the conference web page.

Program Committee

Therese Biedl	Univ. of Waterloo
Mark Keil	Univ. of Saskatchewan
Alex Lopez-Ortiz	Univ. of Waterloo
Michael McAllister	Dalhousie Univ.
Henk Meijer	Queen's University
Tom Shermer	Simon Fraser University
Bettina Speckmann	ETH Zurich
Cao-An Wang	Memorial Univ.
Stephen Wismath	Univ. of Lethbridge

Important Dates

Submission	May 2, 2003
Notification	May 31, 2003
Final version	June 27, 2003
Conference	August 11-13, 2003
