

Network Computing

Computer Science 3171 (CRN 31212)*

Summer 2003

Lecture Time:	Mon., Wed., & Fri. 3:35pm – 4:30
Lecture Room:	Auditorium, Computer Science Bldg. & Tupper Auditorium 'C' [†]
Professor:	James Blustein
	Office Hours: Wed. 10:30am – 12:55, or by appointment
	Office: Computer Science 223
	E-mail: <jamie@cs.dal.ca>
	Telephone: 494-6104
Course website:	<URL: http://www.cs.dal.ca/~jamie/CS3171/README.shtml >
Required Textbook:	<u>Computer Networking: A Top-Down Approach Featuring the Internet</u> (Second edition) by James F. Kurose and Keith W. Ross. © 2003 by Addison-Wesley Longman. (ISBN 0-201-97699-4). [hard or soft copy]
Assessment Components:	Assignments & Homework 20%
	Test #1 (TBA) 15%
	Test #2 (TBA) 20%
	Final exam 45%

Textbooks

You may purchase either the textbook (hardcopy) or you can purchase the rights to use an online version (softcopy) book for six months for \$25. See the textbook website at [URL:http://ocawlonline.pearsoned.com/bookbind/pubbooks/kurose-ross1/](http://ocawlonline.pearsoned.com/bookbind/pubbooks/kurose-ross1/) for more information.

1 Course Content and Goals

1.1 Description

From the Dalhousie Calendar:

This class gives students a foundation in computer networks. It presents the physical and architectural elements, and the information layers of a communication system. The class also familiarizes students with up-to-date techniques in distributed systems such as CORBA, IDL, COM and DCOM. The class concludes with background in client-server network services and in techniques for building web applications.

*3 credit hours, undergraduate course, syllabus version 05 May 2003 (1b).

[†]From 26 May – 06 June we will meet in the Tupper Building.

1.2 Expectations

My rôle of your professor is not to teach as such but to *help you to learn*. You are responsible for your own learning. I will explain and motivate the material. I will give you assignments that will help you to practice and improve your skills. I will try to make the assignments interesting and challenging.

Our time in the classroom will be used for lectures, discussions, quizzes, and work in groups. I expect you to participate meaningfully in all of those activities.

I expected you to attend each class and to be on-time. If you miss a class, for any reason, you are responsible for the material covered, any assignments that were given, and any announcements that were made. I will try to make copies of lecture notes, etc. available at the Killam library, on my website, or both.

A tentative list of topics for us to study is at the end of this syllabus. The list and order may change depending on what the class as a whole has as background knowledge and what I feel is necessary for you to get the most out of the project. Before I lecture about most topics I will assign readings from the textbook or elsewhere for you. You will get the most benefit from the class if you have completed the assigned reading and made notes before the class. If you cannot complete the reading before the lecture and in-class discussion then you should do the reading carefully after class.

1.3 Help

You will find that there are many resources to help you in this class: your professor, the materials provided by your professor, the textbook, the lab, certain websites, and the other students. In the end however the responsibility for learning is yours. Details of the various assignments will be discussed in class. All students are expected to do their own work!

The office hours listed on the front of this syllabus are times when I will be in or near my office. You may drop-in to discuss anything related to the course during those times. If you want to meet with me at some other times then it is best for you to make appointment, but you can also come to my office in case I have time available right then. You can make appointments in person (e.g. after class or during my office hour), by e-mail or by telephone.

1.4 Computer Accounts

You will automatically be given user accounts in two systems: the Unix system `borg.cs.dal.ca` (or possibly `locutus.cs.dal.ca`) and the Novell file server `skywalker`. To discover your user name and password:

1. connect to `borg` using the `telnet` protocol
2. enter *discover* as the username, and enter *query* as the password
3. the system should ask you to enter your student number
 - type in your Banner ID
 - remember to use a capital B

If you registered late for the class then you should seek assistance at the Help Desk (near the labs on the main floor of the Computer Science building).

2 Policies and Rules

Students are subject to all applicable University and Faculty policies. By your enrollment in this course beyond the first day you are deemed to be fully aware of all such obligations and responsibilities so most of them will not be repeated here. I do want to draw your particular attention to some of them however.

Any student wishing to discuss an **accommodation on the basis of permanent or temporary disability** is asked to register with the [Student Accessibility Services](#) (formerly known as the office for Services for Students With Disabilities) in room G28 of the Killam Library, or by telephone at 494-2836.

Your grade should reflect how much you can demonstrate you know and can apply about the topics of this course. If you have registered with that Office then I will be guided by their advice in deciding how you are asked to demonstrate that knowledge.

Plagiarism will not be tolerated. You must do your own work and provide proper credit when quoting or paraphrasing the work of others. This policy applies equally to text, images, and program code. You may use any standard style guide you wish so long as you use it consistently. The reference desk at the Killam library or your professor can offer suggestions for style guides. When citing webpages you must include the following: (1) the address of the webpage, (2) the author of the webpage or a note that it is anonymous, (3) the date that the page was last updated or, if that is not available, the date that you read the page and a note to that effect.

2.1 Assignments and Homework

Multi-page homeworks must be neatly stapled and your name and row number must appear on the top sheet. Homeworks that are not stapled and documented will not receive full marks.

2.2 Quizzes, Tests, and Exams

All tests, and quizzes will be held in the classroom. Exams will be scheduled by the Faculty and University.

No make-up tests will be given without my permission. You will not get my permission without either prior notice of absence, a detailed letter from your physician, or evidence of a serious family crisis that required your attention. Make-up exams and tests may be administered in an essay form.

2.3 Grading Scale

The definitions of grade levels are in the Dalhousie University 2000/2001 Undergraduate Calendar (Feb. 2002, Section 17.1, pp. 35). I will be guided by the following chart to convert from the numeric grades you earn to the letter grade that will be recorded at the end of the course.

$\geq 93\%$	A^+	$\geq 77\%$ and $< 80\%$	B^+	$\geq 67\%$ and $< 70\%$	C^+	$\geq 50\%$ and $< 60\%$	D
$\geq 85\%$ and $< 93\%$	A	$\geq 73\%$ and $< 77\%$	B	$\geq 63\%$ and $< 67\%$	C	$< 50\%$	F
$\geq 80\%$ and $< 85\%$	A^-	$\geq 70\%$ and $< 73\%$	B^-	$\geq 60\%$ and $< 63\%$	C^-		

Assignments Are Essential

You must have submitted at least 60% of the assignments and homeworks (within five days of their being due) to earn a grade higher than C⁺.

You must achieve a weighted average of at least 60% in the tests and final exam to earn a grade higher than C.

2.4 Late Policy

Late work will be penalized 5% per day (or part thereof) for the first day, and 10% per day after that. Saturday and Sunday will count as one day for this policy. You may not receive credit for work that is more than 4 days late.
